

CORPORATE MISSION STATEMENT

The **Flexyfit Academy** (Flexyfit Plus GmbH) is a private educational institution that has set itself the goal of offering comprehensive training and further education programs. In addition to providing sound technical training, the educational content is also intended to introduce students to the real world of work. We are particularly committed to three requirements:

1 Practical orientation

The participants in our training courses learn in a very practice-oriented way what their future field of employment looks like. Communication is always kept open through constant feedback from both sides. Our trainers are constantly striving to respond to each individual personality in a differentiated and individual way. This almost guarantees maximum training success.

2 Quality orientation

The Flexyfit Academy strives to live up to several quality seals. This means that our organization guarantees a high level of quality in the content of our training and further education courses. Our participants are individually supported AND challenged. Our graduates are our flagship and therefore it is more important to us to certify quality rather than quantity.

3 Market orientation

Flexyfit Academy's courses are strongly oriented towards the current market situation,

supply and demand. This enables our graduates to gain an immediate foothold in the industry, whether on a fee basis or as part-time or full-time employees.
